

SESAM Release 8.4.6

Release Notes

Release 8.4.6 of SESAM is a major software release containing new features.

NEW FUNCTIONALITIES

The purpose of this release is to introduce the removal of the "Use of the resources" table and to improve different reports and documents.

This release also focuses on data consistency for the information coming from the CPM system and on different layout modifications.

- The table B2 (Foreground Exploitation) in Final Report is now properly filled with the appropriate data.
- Minor changes were applied to the forms of Declaration of the Conformity for MC-IEF/MC-IIF/MC-IRG/MC-IOF/MC-ERG.
- The system was improved to interface with the new CCM2 API.
- The ARES/HERMES identifier is now stored with the registered deliverable in CPM.
- Disclaimers were added to the REA reports (ERG/IRG/CIG and IxF schemas).
- The BSG-CSO final reports were improved with new text boxes in section G.
- The table "Use of the resources" is now removed for the new reports.
- It's no more possible to create a Declaration of conformity when the start date has not yet been defined in CPM.
- Any form including a Legal Representative is now pre-filled with the "First Administrative Officer" retrieved from CPM.
- The user now stays on the same page after saving a report.

- The banner for SESAM external modules was updated to comply with the European Commission new visual identity.
