D6 Work Package 2 TRISK Mid term Event report was written by the University of Milan (UMIL) to disseminate the results of the project European Advanced Risk Assessor Accredited Training Programme for Highly Qualified Toxicology Experts (TRISK).

TRISK is co-financed by the European Commission Second Programme of Community Action in the field of Health (2008-2013) under the priority action to improve citizens' safety for a period of 37 months starting February 2009 and ending February 2012 (agreement no. 20081102).

Sole responsibility for this publication lies with the authors and the Executive Agency for Health and Consumers is not responsible for any use that may be made of the information contained herein.
This document is the result of Work Package 2 Dissemination of Results outlining activities performed following the official launch of TRISK in September 2009.

### Timeline & Activity Overview

**Accomplished Activities**

1) **Continuous dissemination of key activities related to TRISK.**

The continuous contacts with key stakeholders and collaboration partners after the official launch have served to keep TRISK as a top of mind initiative while raising awareness and understanding of the project. Furthermore, the various communications sent during this period have also served to inform about the ongoing activities of the project.

The press releases send during the period October 2009 thru July 2010 are listed below:

- Oct 2009 - Official launch of TRISK in Dresden
- Nov 2009 - TRISK recruitment results
- Feb 2010 - TRISK modular program launched
- Mar 2010 - ASSETs survey: Understanding risk assessment training
- May 2010 - Risk Assessment Knowledge Base area launched
- June 2010 - TRISK organizing information session in Barcelona
- Sept 2010 – TRISK holds successful informative session during the 2010 IUTOX congress

All Press Releases are found in the TRISK website

http://trisk-project.eu/dissemination/downloadables
2) Development of intranet structure to upload information associated to course modules.
The development of the Modular & Applied Training intranet structure (accessed by trainees and project partners) has allowed faculty members to upload presentations and other course documents before and after the organization of the modules making it easier for trainees to gather course material used in the training module.
3) Creation of TRISK certificate template

The creation of a TRISK certificate template allows project partners to present a standard training module certificate of participation to trainees after the conclusion of the module.

Picture 3 – Modular Training program certificate
4) Development of intranet structure and to upload/share documents among project partners.
The development of the Project Partners intranet structure (accessible only to project partners) has allowed partners to upload project related documents to share with other partners and serves as an effective tool to exchange documents among partners in particular prior to conference calls or coordination meetings. Project templates (deliverable cover letters, letterhead, powerpoint presentation, logos, certificate, etc.) have been uploaded in this section as it allows partners to find such items easily.

Picture 4 – Project Partner intranet structure
5) Development of risk assessment knowledge base (KB) area.
The development of the Risk Assessment Knowledge Base area serves as a basis to collect risk assessment resources and information in one single location and with the overall objective to serve as the reference point for risk assessment professionals and toxicology community. The long-term goal is to strengthen the knowledge of the risk assessor and create awareness of the risk assessment process and professional profile.
6) Consolidation of collaboration partnership with Elsevier.
The publication of TRISK’s institutional poster in the March 2010 issue of Elsevier’s Toxicology Letters and
the link exchange (TRISK’s website is featured in Elsevier’s Toxicology Letters portal) has allowed greater
reach and visibility among stakeholders and professionals in the scientific community.

7) Creation of website banners featuring collaborating partners.

The banners created serve as a way to recognize collaborating partners that support TRISK and as a tool to promote the recruitment of new collaboration partners.

Picture 8 – Collaboration Partner banners

8) Creation of website banners promoting informative session in 2010 IUTOX Barcelona congress.

The banner served to create awareness of the planned event and provide a general overview of topics that would be addressed in the session by linking of the banner to the session program.

9) Informative session held during the July 2010 IUTOX Barcelona congress.
The informative session organized July 20, 2010 from 14.30 to 16.00 and with the support of a ECETOC
(stakeholder), EFSA (regulatory) delegate and project testimonial (current TRISK trainee) served to
disseminate key project results and obtain underlie the importance and relevance of TRISK in the
preparation of the next generation of risk assessment professional by offering the training and recognition.
More than 150 participants attended the session. Presentations can be downloaded from the TRISK
website.

Informative Session: TRISK Risk Assessor training: ensuring availability of highly qualified professionals
Co- Chairs: Corrado Galli and Bas Blaabouer

14.30 - 14.45 Benefits of European Risk Assessment Accreditation
Corrado L. Galli, Project Coordinator

14.45 - 15.00 Fundamentals and key aspects of TRISK
Emanuela Corsini, University of Milan Module 3 Coordinator

15.00 - 15.15 Lessons learnt of risk assessment training
Carmen Estevan, TRISK trainee

15.15 - 15.30 The reaction of industry stakeholders
Giuseppe Malinverno, on behalf of ECETOC

15.30 - 15.45 EFSA Journal: a source of high quality risk assessments
Carola Sondermann

15.45 – 16.00 Open discussion and conclusions
