Project abstract

The overarching goal of the SFP Coalition multiannual work programme between 2018 and 2021 is to prevent cancer and chronic diseases through smoking prevention at EU and national level with a special focus on young people and health in all policies.

The first year of our 2018-2021 multiannual plan will set the foundation for SFP's four main multi-sectoral campaigns in the coming years, while delivering specific activities and achieving concrete deliverables in 2018. The key campaigns for 2018 will focus on the forthcoming revision of the Tobacco Tax Directive. In this context we will also work with society organisations to call on their governments to ratify the Illicit Trade Protocol and to monitor the implementation of the EU system for tracking and tracing of tobacco products.

SFP will also work on promoting the understanding and implementation of FCTC Article 20 and towards the inclusion of SDG Target 3.4 (reducing NCDs) and 3.a (implementation of the FCTC) in national development plans. SFP will support the implementation of the FCTC at national level through the provision and exchange of evidence-based materials in particular with regard to Art 5.3 (tobacco industry interference), Art 8 (smoke-free policies), and Art 11&13 (especially plain packaging and point of sale measures).
