

## The European Union's aggregated fishing effort on effort stocks in the year 2023

### Explanation of the data

The list below contains the European Union's aggregated fishing effort on effort stocks in the year 2023.

The effort is expressed in days (D) or kilowatt-days (KWD) depending on the category.

The initial quota is the quota defined in the Fishing Opportunities Regulation, and the adapted quota is the final EU quota at the end of the year 2023, after swaps, transfers and deductions have been applied. The uptake (%) is calculated from the adapted quota. Column Fishing Stop contains the date when a fishing stop was declared on the stock (no fishing stops on effort were declared in 2023).
