MALTA

Date of data collection or reference period	Reference period 2020-2022
Reporting body	National Statistics Office
Reporting price discounts on motor fuels	N/A
Market coverage and data sources	Almost full market coverage of the consumer prices of fuels sold at filling stations and by oil companies. Data based on Enemed published prices. Enemed is a major player and to date its prices are considered to be equivalent to market prices in Malta.
Price averages	Arithmetic average
Biofuels	• In terms of the national legislation, specifically the Sixth Schedule of Regulation 33 of the S.L. 545.17, Petroleum for the Inland Wholesale Fuel Market, Bottling of LPG and Primary Storage Facilities Regulations, the minimum biofuel content expressed as a percentage amount (%) to be released to the inland market by the importer of SM EN 228 petrol and, or SM EN 590 diesel calculated by energy content was 10.0% in year 2020, 10.5% in year 2021 and 11.0% in year 2022. The volume of biodiesel (FAME) should not exceed 7.0% in the diesel blend in order to be within the SM EN 590 quality standard of automotive diesel. Note that the term biofuel includes biodiesel (FAME), HVO, etc. • Biofuel components in blends are subject to the same level of excise duties as fossil fuel components. Pure biofuels – e.g. B100 – are subject to the same excise duty as regular automotive diesel.
Other indirect taxes reported	Not applicable
