

Written Record of fisheries consultations on 16 and 17 October 2024 between the European Union and the United Kingdom on Norway Pout (*Trisopterus esmarkii*) in ICES division 3a, UK and Union waters of sub-area 4, and UK waters of division 2a, (North Sea) from 1 November 2024 to 31 October 2025

1. The Trade and Cooperation Agreement ('the TCA') between the United Kingdom (UK) and the European Union (EU) includes the objective of cooperating with a view to ensuring that fishing activities for shared stocks in their waters are environmentally sustainable in the long term and contribute to achieving economic and social benefits, and requires the Parties to hold consultations annually to agree the total allowable catches (TACs) for the following year for the stocks listed in Annex 35 to the TCA. Norway Pout (North Sea) (NOP/2A3A4) is included in that Annex.

2. A Delegation from the United Kingdom headed by Ms Imogen CESSFORD and a Delegation from the European Union headed by Dr Norman GRAHAM met in a virtual format on 16 and 17 October 2024 to consult on fishing opportunities for Norway Pout (North Sea) (NOP/2A3A4) from 1 November 2024 to 31 October 2025 in accordance with Article 498 (Fishing Opportunities) of the TCA. This Written Record documents the outcome of those consultations.

3. The Heads of Delegations agreed to recommend to their respective authorities the fishery arrangements from 1 November 2024 to 31 October 2025 outlined in this Written Record, including Annex 1. Accordingly, where this Written Record refers to the Delegations (or the Parties) having agreed on a matter, it should be read as an agreement to recommend to the Delegations' respective authorities to implement the arrangements in this Written Record, including Annex 1.

4. The Delegations took note of the ICES zero-catch advice for Norway pout (ICES sub area 4 and division 3.a) from 1 November 2024 to 31 October 2025. Delegations noted that there are no catch scenarios that would rebuild the spawning stock biomass for 2026 therefore no directed fisheries for Norway Pout will be permitted during this period. In order to account for small amounts of unavoidable bycatches of other fisheries, the Parties agreed to set a bycatch TAC of 400t from 1 November 2024 to 31 October 2025. The level of the bycatch TAC is based on levels of recent unavoidable bycatches in other fisheries. The Parties agreed to work together to review fishing patterns and landings against the bycatch TAC for the next TAC year (2025-26). Details of the TAC and each Party's allocation are shown in Annex 1.

5. Noting that this is a bycatch only TAC and that there will be no seasonal directed fishery in November and December 2024, the parties agree it is more appropriate to apply the EU-UK TCA quota shares for 2025 to the whole TAC.

6. The other relevant arrangements for Norway Pout (North Sea) set out in paragraph 5 of the Written Record of fisheries consultations between the United Kingdom and the European Union for 2024, signed on 8 December 2023 and amended on 11

December 2023, 16 January 2024, 12 March 2024, 4 June 2024 and 17 June 2024, will continue to apply.
