EUDAMED
Hotfix release note

Playground 3.8.1
2024

1 Scope

Introduction

This is a hotfix release to address two identified defects in the authorization and message processing of the payloads sent by third-parties when using DTX.

Release content

This document outlines a brief overview of the changes in EUDAMED Playground v 3.8.1 compared to the previous release:

DTX Changes

Fixed a bug related to user authorization for sending XML messages and improved error reporting in this area.

Fixed a bug affecting internal communication with EDelivery server, some of the xml messages sent by the user were not being correctly directed to EUDAMED in a timely fashion.

Ticket id	Ticket Description
EUDAMEDMDR-29142	UDI_DI PATCH Access Denied
EUDAMEDMDR-29439	As a third-party actor linked to Access point, I get an unauthorized access error
