

Why a network for FLAGS

Number of LAGs and FLAGS in Sweden with mono- and multifunded strategies

48 Lag
13 Flag

■ only EMFF

■ several Funds including EMFF

■ no EMFF

Around 7 % of the total amount is financed through EMFF

Last period we introduced a network and learned a lot from that

- We think it is useful to have a network specialized on fishing industry, though the FLAGs are part of the rural network
- We think it is useful to be a closer group where people know each other
 - To show good examples
 - To learn of each other
 - To discuss difficulties and possibilities
- Sometimes it is useful to be "one voice" for example when speaking with managing authority
