

COOPERATION IDEA

for Fisheries Local Action Groups

Title of the proposed project: Utilizing the cyprinid species

Description of cooperation proposed

We are looking for solutions to grade, scale and gut cyprinid fish, mainly roach. We have large stocks of cyprinids and a rising market for them and, as such, are looking for cost-effective handling facilities to increase their consumption. Indeed, in many Finnish lakes, the large cyprinid stocks are negatively affecting the water quality, so utilizing them will also bring environmental benefits.

- Objectives: Utilizing cyprinids for human consumption
- Proposed actions: Bench-marking or developing cost-effective processing machinery
