

BU-code stands for Blocking/Unblocking a telephone device.

You can block your desk phone using your BU code.^[1]

If you do not know your BU code you can find it in [eGestel](#). Click on My personal data and you will find your BU code highlighted in your extension table under My personal extensions.

If you dial *44BUcode on your desk phone, the calls will be restricted. To set it back to normal operation you have to dial #44BUcode.

We suggest you to use your BU code to block your desk phone when you leave on holiday to prevent misuse during your absence.
