

The **European System of National and Regional Accounts 2010 (ESA2010)** was published in the Official Journal on 26 June 2013 and implemented as from September 2014; i.e. from that date onwards the data transmission from Member States to Eurostat have to follow ESA 2010 rules, instead of those of [ESA 95](#).

The ESA 2010 is broadly consistent with the System of National Accounts 2008 (SNA2008), the world-level harmonised reference methodology for national accounts.

Formally, the ESA is a legal act, it has more precise definitions and it is intended as reference guide, whereas the SNA includes more explanations and background information, and it can be used as a teaching handbook for statisticians worldwide.^[1]
