- [EASA, SIB 2020-02R4 : Coronavirus ‘SARS-CoV-2’ Infections – Operational Recommendations: High Efficiency Particulate Air \(HEPA\) filters have demonstrated good performance with particles of the SARS-Cov-2 virus size \(approximately 70-120 nm\). Whenever performing commercial air transport of passengers during the COVID-19 outbreak, aircraft operators employing recirculation of cabin air, are recommended either to install and employ HEPA filters ... Furthermore, when HEPA filters are installed, recirculation fans should not be stopped, but increased fresh air flow should be promoted by selecting high PACK FLOW, whenever possible.](#), published on 7 April 2020.
