

WinSCP (Windows Secure Copy) is a free and open-source [SFTP](#), [FTP](#), [WebDAV](#) and [SCP](#) client for Microsoft Windows. Its main function is secure file transfer between a local and a remote computer.^[1]

This is a [stub page](#), in other words an article too short to provide more than rudimentary information about a subject. Anyone can edit a stub article, or remove a stub template from an article which is no longer a stub.

It is available as a virtualized application.

Version

- 5.15 released on 13 August 2019.
- 5.7.7 released on 10 April 2018.
