The **Open Data questionnaire** is available for all standard H2020 projects in which Art. 29.3 ("Open access to research data") of the **Model Grant Agreement** applies, meaning for all actions participating in the **Open Research Data Pilot**:

- BBI-CSA/IA-DEMO/IA-FLAG/RIA
- COFUND-EJP/PCP/PPI
- CS2-CSA/IA/RIA
- CSA/RIA/IA
- CSA-LS
- ECSEL-IA/RIA
- ERA-NET-COFUND
- ERC-ADG/ERC-COG/ERC-LVG/ERC-STG
- ERC-POC
- FCH2-CSA/IA/RIA
- H2020-EEN-SGA
- IMI2-CSA/IA/RIA
- MSCA-COFUND-DP/FP
- MSCA-ITN-EID/EJD/ETN
- MSCA-RISE
All projects participating in the Open Research Data Pilot must use a Data Management Plan (DMP).

The questionnaire is available for both Continuous and Periodic Reporting.

Please see Art. 29.3 ("Open access to research data") of the Model Grant Agreement. See also the Guidelines: Open access to publications and research data in Horizon 2020.

The information of the Open data questionnaire will be included in the technical part of the relevant periodic report (pdf).

The Open Data tab lists the:

- **Open Datasets suggested by OpenAIRE**: a list of open datasets that could be linked to the project and available in Open Access repositories, collected by OpenAIRE (previously discarded open data sets will no longer appear in the list of open data sets suggested by OpenAir publications).
- **Project Open Datasets**: shows the datasets which the Consortium has confirmed as linked to the project.

In case an open dataset linked to the project is not listed in the 'Suggested' table, you can manually add it in the 'Project Open Datasets' table.
If the project doesn't have any Open Dataset yet, please check the box.

This project does not currently have any Open Dataset

<table>
<thead>
<tr>
<th>Suggested open datasets from OpenAIRE</th>
<th>Actions</th>
</tr>
</thead>
</table>
OpenAIRE suggests open datasets, which you can (see actions):

**import:** which makes the publication appear in the project Open Datasets list (see below)

**discard:** which makes the publication disappear from the list of suggested open datasets from OpenAIRE

Previously discarded open data sets will no longer appear in the list of open data sets suggested by OpenAir publications.

<table>
<thead>
<tr>
<th>Project Open Datasets</th>
<th>Actions</th>
</tr>
</thead>
</table>

**Importing a dataset** (which makes the publication appear in the project Open Datasets list):

Click on an open dataset to open up the dataset

Please verify or correct the information about the dataset and fill-in any additional information when possible.

then click the button

**Discarding a dataset** (which makes the publication disappear from the list of suggested open datasets from OpenAIRE)

Click the **button** in the actions column of the relevant dataset, or

Click the **button** after you double clicked on the relevant dataset
This list displays the open datasets which have been selected as pertaining to the project.

Adding a dataset manually

Click the button Please verify or correct the information about the dataset and fill-in any additional information when possible. If your dataset is:

**openly accessible/reusable** – provide the Digital Object Identifier (DOI) (if available) and click enter (this will automatically retrieve the associated information - repository link and title) or complete all fields manually. Check the correspondent radio-button (dataset accessible/reusable) linked to a publication – provide the DOI of the linked publication.

Click the button

Removing a dataset

Click the button on in the actions column of the relevant publication, or Click the button after you double clicked on the relevant publication.

Editing a dataset

Double click the relevant publication update the missing/relevant fields click the button

<table>
<thead>
<tr>
<th>Explanation of columns</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DOI</strong></td>
<td>Digital Object Identifier: this is a unique a unique string of characters allocated to a website, file, or other piece of digital information.</td>
</tr>
<tr>
<td><strong>Accessible</strong></td>
<td>The open access to the dataset is already established or it will be established after an embargo period.</td>
</tr>
<tr>
<td><strong>Reusable</strong></td>
<td>The dataset is reusable: the technical standards used are compatible and the necessary rights are in place for other users to use the dataset.</td>
</tr>
<tr>
<td><strong>Repository Link</strong></td>
<td>The link leading to the dataset stored in an OpenAIRE repository.</td>
</tr>
<tr>
<td><strong>Non-repository link</strong></td>
<td>The link leading to the dataset stored outside an OpenAIRE repository.</td>
</tr>
<tr>
<td><strong>DOI Linked Publication</strong></td>
<td>Digital Object Identifier of the publication to which the dataset is linked.</td>
</tr>
</tbody>
</table>
