The Secretariat is pleased to publish the Ocean Energy Forum Strategic Roadmap which was formally delivered to the European Commission on 08 November 2016. Publication of the Roadmap culminates the end of over two-years' work by Ocean Energy Forum stakeholders. The Roadmap identifies a path forwards, building on European leadership in ocean energy, and developing technologies that can meet a significant amount of Europe's power demand over the next 35 years.

The Secretariat would like to thank all those involved to date in the production of the Roadmap.

Please note that the Draft Roadmap, published October 2015 is no longer available on this website.
