

MARITIME FORUM

Sustainable and circular Bioeconomy, the European way

Event date:
22/10/2018 - 00:00

Place: Brussels, Belgium

The emerging bioeconomy is moving from research niche to market norm and Europe needs to maintain its current global leadership.

The conference will focus on the need to have a sustainable and circular bioeconomy to enhance the transition in a changed EU policy context and towards a new environmental, social and economic reality. It will also set the scene for the start of the discussion about synergetic actions across different priority areas:

- support strategic research and innovation, and strengthen support for education and training,
- upscale the bio-based sectors, mobilise investments, support the creation of markets, develop better monitoring,
- encourage the adoption, update and coherence of national and regional Bioeconomy Strategies throughout Europe with citizens engagement,
- strengthen the understanding and resilience of land and sea ecosystems,
- monitoring and assessment of bioeconomy development

During the event, a *bioeconomy corner* will showcase tangible bio-based products

Come and meet the Blue Bioeconomy Forum team! We will be present at this event, and it will be the occasion to share with you our latest work.
